

SUMMARY

Senior Security Analyst with 14+ years of experience in data security, DLP, and access governance, with hands-on expertise in Microsoft Purview, Defender suite, and Varonis. Skilled in incident investigation, insider threat detection, and implementing enterprise-wide data protection strategies.

SKILLS

Microsoft Security	Microsoft Purview DLP, Azure, MDCA, MDE, Varonis
Data Security	Data Discovery and Classification, Data Security
Incident Response	Incident Investigation and Response, Security Monitoring & Analysis
Data Protection	Sensitivity Labels & Information Protection, Cloud App Security and Governance
Threat Detection	Insider Threat Detection, File Activity Monitoring
Audit & Monitoring	Activity Explorer & Audit Logs, RSA Server

EXPERIENCE

Associate Consultant

Feb 2022 – Present

Tata Consultancy Services

- Implemented and managed Microsoft Purview DLP policies across Exchange Online, SharePoint, OneDrive, Teams, and Endpoint devices to prevent sensitive data leakage.
- Performed the end-to-end DLP policy lifecycle, including requirement gathering, analysis, validation, testing, fine-tuning, deployment, and rollout.
- Conducted in-depth investigation and analysis of DLP alerts and incidents, identifying potential data exposure and ensuring appropriate remediation actions.
- Created and customized Sensitive Information Types (SITs) and classifiers to enhance detection accuracy based on business requirements.
- Designed and implemented sensitivity labels and label policies, enabling data classification, encryption, and access control.
- Monitored and analyzed activities using Activity Explorer and Content Explorer to track data movement and user behavior.
- Investigated external data sharing incidents, ensured compliance with organizational policies, and escalated high-risk cases.
- Performed policy tuning and optimization, significantly reducing false positives and improving alert quality.
- Prepared and presented weekly and monthly security reports, highlighting DLP incidents, trends, policy effectiveness, and risk insights to stakeholders.
- Participated in client and stakeholder meetings, providing regular updates on ongoing investigations, incidents, and data protection initiatives.
- Implemented enhanced monitoring and restrictive DLP controls for users exiting the organization to prevent data exfiltration.
- Proactively added high-risk users to strict DLP policies, ensuring sensitive data protection during the offboarding process.
- Monitored user activities for at-risk employees and escalated suspicious behavior to prevent potential data leakage.
- Monitored and investigated Microsoft Defender for Cloud Apps (MDCA) alerts, performed risk assessments, and escalated incidents as required.

- Managed cloud application governance in MDCA, including sanctioning and unsanctioning applications based on security policies.
- Conducted Microsoft Defender for Endpoint (MDE) alert monitoring and investigation to detect and respond to endpoint security threats.
- Performed audit log analysis using Unified Audit Logs to support investigations and trace user activities across Microsoft 365 services.
- Used ServiceNow for incident tracking, ensuring timely resolution in accordance with SLAs.
- Prepared SOPs, documentation, and incident response playbooks for DLP and security operations.
- Collaborated with cross-functional teams to investigate incidents, implement controls, and enhance data protection strategies.

Professional 1
DXC Technology

Apr 2017 – Feb 2022

- Implemented and managed Varonis Data Security Platform for data discovery, classification, and monitoring across Windows file servers, OneDrive, and SharePoint.
- Configured and maintained NetApp devices, Windows filers, F-Policy servers, and directory services while monitoring and investigating security incidents and intrusion attempts in coordination with the triage team.
- Utilized Varonis classification engine to identify and monitor sensitive data, including PII, financial, and confidential information.
- Performed in-depth investigation of abnormal file access patterns and potential data exfiltration using Varonis alerts and analytics.
- Conducted file activity monitoring and user behavior analysis to detect insider threats and unauthorized access to critical data.
- Remediated excessive and inappropriate permissions, improving the least-privilege access model and strengthening data security posture.
- Collaborated with stakeholders to identify overexposed data and implement corrective actions to reduce security risks.
- Performed User Behavior Analytics (UBA) to identify anomalous user activities and detect potential insider threats.
- Analyzed user activity patterns such as file access, downloads, sharing behavior, and login trends to identify deviations from normal behavior.
- Investigated high-risk user activities, including unusual access to sensitive data, mass downloads, and access outside business hours.
- Monitored and flagged suspicious user behavior, escalating potential insider threat incidents as per defined procedures.
- Conducted risk-based analysis of users, especially for privileged and departing employees, to prevent data exfiltration.
- Generated behavioral insights and reports to support proactive security measures and decision-making.

Associate Professional
Computer Sciences Corporation (CSC)

Dec 2012 – Apr 2017

- Creation and administration of Active Directory accounts and providing them with relevant rights on domain.
- Created and administered Active Directory accounts with appropriate domain rights.
- Managed Outlook mailboxes using the Exchange 2010 Console.
- Provisioned and maintained Mainframe access accounts.
- Created and administered SFTP, JDE, and Lync accounts.
- Conducted internal audits to achieve 100% quality compliance.

- Prepared and provided evidence for SOX audits.
- Trained new team members and maintained up-to-date process documentation.

Information Security Risk Analyst
Hongkong and Shanghai Banking Corporation (HSBC)

Jul 2010 – Dec 2012

- Worked as an IT Security Analyst for access management, providing assistance to bank employees across Asia Pacific.
- Created user Active Directory accounts and provided relevant rights on the domain using ARS (Active Role Server).
- Performed tasks such as adding, removing, and managing user accounts, granting permissions on share drives, and applying group policies.
- Deleted accounts of resigned staff and changed account types from Primary to Secondary and vice versa.
- Added new computers to server workstations and granted access to users in various groups.
- Created and maintained VPN profiles on RSA Server for both hard and soft tokens, including Blackberry users.
- Deleted tokens on the RSA Server, replaced lost RSA tokens, transferred RSA tokens between users, and renewed tokens upon expiration.

KEY ACHIEVEMENTS

- Reduced false positives in DLP alerts by fine-tuning policies, improving detection accuracy and operational efficiency.
- Successfully implemented end-to-end DLP controls across Exchange, SharePoint, OneDrive, and Endpoint, strengthening overall data protection.
- Prevented multiple potential data leakage incidents by proactively monitoring and investigating high-risk user activities.
- Improved incident response time through effective alert triaging, investigation, and escalation processes.
- Reduced overexposed sensitive data by 30% by leveraging Varonis insights and remediating excessive access permissions.
- Strengthened data security during employee offboarding by enforcing strict monitoring and blocking policies for departing users.
- Enhanced data classification accuracy by creating and fine-tuning Sensitive Information Types (SITs) and sensitivity labels.
- Played a key role in improving organizational security posture through continuous security improvements.

CERTIFICATIONS

- Adminstrating Information Security in Microsoft 365 (SC-401)
- Microsoft Azure Security Engineer (AZ-500)
- Azure Fundamentals (AZ-900)
- Information Technology Infrastructure Library (ITIL)
- Certified MCITP 2008 Server Administration
- Certified ISO/IEC 27001 Lead Auditor
