

GAURAV PRATAP

DEVOPS ENGINEER

Noida, Uttar Pradesh | +91-8368939465 | Gauravpratap7404@gmail.com |

SUMMARY

Azure Cloud & DevOps Engineer with 4+ years of experience in Azure infrastructure, cloud automation, and deployment across Dev, QA, UAT, and Production environments. Experienced in Azure VMs, VNet, Subnets, NSG, Load Balancer, Application Gateway, Storage, Key Vault, Entra ID, RBAC, Azure Monitor, Log Analytics, Backup, AKS, and ACR. Hands-on experience with Terraform, Azure DevOps, YAML pipelines, CI/CD, Git, GitHub, PowerShell, and Azure CLI for infrastructure provisioning and application deployments. Worked on Terraform modules, remote state, Docker, environment-based configurations, and automated deployment processes. Experienced in DevSecOps, production troubleshooting, release support, infrastructure monitoring, resource right-sizing, and Azure cost optimization, with practical knowledge of TFLint, Checkov, and tfsec for Infrastructure as Code security checks.

SKILLS

Cloud: Microsoft Azure
Compute: Azure Virtual Machines (VMs)
Networking: VNet, Subnets, NSG, Load Balancer, Application Gateway
Storage: Storage Accounts, Blob Storage
Identity & Access: Microsoft Entra ID, Azure RBAC
Security: Azure Key Vault, NSG, RBAC
Monitoring: Azure Monitor, Log Analytics
Backup: Azure Backup
Containers: Docker, Azure Kubernetes Service (AKS), Azure Container Registry
Infrastructure as Code: Terraform, Terraform Modules, Remote State, Environment-based Configuration
DevOps & CI/CD: Azure DevOps, YAML Pipelines, CI/CD, Automated Deployments, Release Management
Version Control: Git, GitHub
Scripting & CLI: PowerShell, Azure CLI
DevSecOps: TFLint, Checkov, tfsec, IaC Security Scanning
Operations: Production Troubleshooting, Deployment Support,
Cost Optimization: Resource Right-Sizing, Resource Utilization Monitoring, Azure Cost Optimization

CERTIFICATION

Azure Administrator Associate (AZ-104)

EDUCATION

B.Sc. (PCM) M.J.P. Rohilkhand University - Bareilly, India

WORK EXPERIENCE

SOFTGRID SOLUTIONS PVT. LTD. AZURE DEVOPS ENGINEER

AUG-2022- PRESENT

- Managed and supported Microsoft Azure infrastructure across Dev, QA, UAT, and Production environments.
- Provisioned and configured Azure Virtual Machines, VNets, Subnets, NSGs, Route Tables, Load Balancers, and Application Gateway based on application and network requirements.
- Managed Azure Storage Accounts, Blob Storage, Key Vault, Azure Backup, Microsoft Entra ID, and RBAC for secure and reliable cloud operations.
- Automated infrastructure provisioning using Terraform, including reusable modules, variables, remote state, and environment-specific configurations.
- Created and maintained Azure DevOps YAML pipelines for infrastructure provisioning, application deployments, and release activities.
- Implemented CI/CD workflows with Git and GitHub to automate build and deployment processes across multiple environments.
- Worked with Docker, AKS, and ACR for container image management and deployment activities.
- Integrated TFLint, Checkov, and tfsec into Terraform workflows to perform IaC security and configuration checks before deployment.
- Used Azure Monitor and Log Analytics for resource monitoring, alerting, log analysis, and identifying infrastructure issues.
- Used PowerShell and Azure CLI to automate administrative tasks, manage resources, and support troubleshooting activities.
- Handled production incidents, deployment failures, and infrastructure issues, performing troubleshooting and root cause analysis to restore services.
- Supported release activities by coordinating with development and QA teams and resolving environment-related deployment issues.
- Monitored resource utilization and performed Azure cost optimization through right-sizing, removing unused resources, and improving resource allocation.
- Followed Azure security, availability, and operational best practices to maintain stable, secure, and cost-effective cloud infrastructure.
